

Aniket Raj

AI / ML Engineer

Delhi, India | +91-7900905797 | sm.aniketraj@gmail.com | portfolio | github | linkedin

Professional Summary

Final-year Computer Science undergraduate (AI & Data Science) and AI/ML Engineer skilled in building multi-agent backend systems, LLM-powered platforms, and retrieval-augmented generation (RAG) pipelines using Python, FastAPI, LangGraph, and modern vector stores. Hands-on experience shipping production AI features – prompt engineering, retrieval pipelines, and model integrations across OpenAI, Gemini, and Groq – alongside production-grade AI systems and backend applications. Solved 1150+ DSA problems on LeetCode.

Technical Skills

Languages:	Python, JavaScript, TypeScript, SQL, C++
Generative AI:	LangGraph, LangChain, RAG, AI Agents, Multi-Agent Orchestration, MCP, Prompt Engineering, Tool/Function Calling, Embeddings
ML / DL:	Machine Learning, Deep Learning, NLP, OpenCV, Scikit-learn, NumPy, Pandas
Model Providers & Vector DBs:	OpenAI, Gemini, Groq, ChromaDB, FAISS
Backend & Deployment:	FastAPI, Async/Concurrent Programming, REST API Design, Docker, MLOps basics
Databases:	PostgreSQL, MySQL, MongoDB, Redis

Experience

Codec Technologies

Artificial Intelligence Intern

May 2026 – Jul 2026

Hybrid

- Built AI-powered features using LLMs and prompt engineering, integrating OpenAI/Gemini APIs and shipping backend APIs for intelligent workflow automation.
- Built retrieval pipelines involving chunking, indexing, and embeddings with OpenAI/Gemini APIs for low-latency, context-aware query resolution; automated reporting, cutting manual effort by 60%.
- Iterated on prompt templates to improve response accuracy and latency, and documented API endpoints for internal use.

Ramyoz Solutions, Punjab

App Developer Intern

Jun 2026 – Aug 2026

On-site

- Built AI-enabled cross-platform mobile apps in Flutter, integrating AI-driven features and REST API calls across core screens.
- Collaborated with senior developers on app-state management and API integration, improving responsiveness and reducing crashes.

Amdox Technologies

Web Developer Intern

Feb 2026 – Apr 2026

Remote

- Developed responsive, high-performance web apps using React, Node.js, and MongoDB, integrating REST APIs end-to-end.

Projects

DeepLens – Enterprise Multi-Agent RAG Platform

Python, FastAPI, LangGraph, LangChain, ChromaDB, FAISS, Groq, Gemini, OpenAI, React, TypeScript, Docker

- Architected a multi-agent RAG platform with routing, retrieval, reasoning, and response-generation agents on an async FastAPI backend with hybrid semantic search (ChromaDB, FAISS), supporting ingestion of PDFs, DOCX, PPTX, images, and emails.
- Built a React + TypeScript interface with real-time chat, citations, and session memory across Groq, Gemini, and OpenAI models.

Loco Pilot – Autonomous AI Software Engineer

Python, FastAPI, LangGraph, MCP, Redis, Docker, Playwright, GitHub API, Groq, OpenAI, Gemini

GitHub

- Engineered an autonomous multi-agent AI software engineer that turns natural-language requirements into production-ready code, integrating GitHub API and MCP servers with persistent memory for self-healing and automated PR generation.

AIVOA – AI-Powered Pharmaceutical Complaint Management System

React, Redux Toolkit, FastAPI, LangGraph, Groq LLM, MySQL, SQLAlchemy, Alembic, OCR

GitHub

- Developed an enterprise complaint management system with AI-assisted intake, risk assessment, duplicate detection, and CAPA/root-cause recommendations on an async SQLAlchemy backend.
- Integrated OCR-based document parsing and a Groq LLM pipeline for automated triage of incoming complaints.

NightOwl – AI-Powered Job Application Automation Platform

Python, FastAPI, Playwright, MySQL, Next.js, AI Agents, ChatGPT, Gmail, WhatsApp

GitHub

- Built an end-to-end AI-powered job application platform that discovers verified company career pages and jobs, analyzes application forms, maps candidate data, and orchestrates dynamic browser-based workflows using FastAPI and Playwright.
- Implemented candidate-question resolution using deterministic rules, Answer Bank matching, contextual ChatGPT fallback, and human-review safeguards for unresolved or sensitive questions.
- Automated complex workflows including dynamic forms, date fields, checkboxes, radio buttons, dropdowns, autocomplete, resume uploads, email verification, multi-page navigation, and final-submission safety checks.

Education

Indian Institute of Information Technology, Manipur

B.Tech in Computer Science & Engineering (AI & Data Science)

2023 – 2027

Certifications & Achievements

- Secured 1st Place in the Website Development Competition at IIIT Manipur
- Ranked 88 in HackerX 2025 Hackathon
- Solved 1150+ DSA problems on LeetCode
- NPTEL – Business Analytics
- NPTEL – Information Retrieval
- NPTEL – Advanced Distributed System
- MongoDB Developer Learning Path – MongoDB University (2025)
- Languages: English (Fluent), Hindi (Native)
