

Aniket Raj

Data Engineer / ML Engineer

Delhi, India | +91-7900905797 | sm.aniketraj@gmail.com | portfolio | github | linkedin

Professional Summary

Final-year Computer Science undergraduate specializing in AI & Data Science, with hands-on experience building data-processing pipelines, validation systems, retrieval workflows, and production backend applications using Python and SQL. Experienced with structured and unstructured data, ETL pipelines, embeddings, RAG, databases, and applied machine learning. Built and maintained production systems used by 50+ and 20+ real users across three internships. Solved 1150+ DSA problems on LeetCode.

Technical Skills

Languages:	Python, SQL, C++, JavaScript, TypeScript
Data Analysis:	Pandas, NumPy, Scikit-learn, Feature Engineering, Data Cleaning, Data Visualization, Time-Series Analysis
Data Engineering:	ETL Pipeline Design, Data Validation & QA, Data Processing, RAG Pipelines, Embedding-based Retrieval, ML Pipelines
Machine Learning:	ML Fundamentals, Model Evaluation, NLP Basics, Predictive Modeling (applied), OCR
Databases:	MySQL, PostgreSQL, MongoDB, SQLite, Redis, ChromaDB, FAISS
AI / LLM:	LangChain, LangGraph, OpenAI, Gemini, Groq, AI Agents, MCP, Prompt Engineering
Tools:	Git, GitHub, Docker, Postman, Jira, Vercel, Render, Playwright

Experience

Codex Technologies

May 2026 – Jul 2026

Artificial Intelligence Intern

Hybrid

- Designed and shipped backend ETL data pipelines in Python, handling structured and unstructured data for intelligent workflow automation.
- Built data validation frameworks and QA logic to verify output accuracy, consistency, and adherence to business rules before production release.
- Developed retrieval pipelines for extracting, chunking, and indexing domain-specific data, enabling context-aware query resolution; automated reporting workflows, cutting manual effort by 60%.

Amdox Technologies

Feb 2026 – Apr 2026

Web Developer Intern

Remote

- Developed responsive, high-performance web apps using React, Node.js, and MongoDB; integrated REST APIs end-to-end, ensuring reliable, validated data flow between services.
- Collaborated with UI/UX and engineering stakeholders on code reviews and data-integrity checks within Agile/Jira sprints.

Ramyoz Solutions, Punjab

Jun 2026 – Aug 2026

App Developer Intern

On-site

- Built AI-enabled cross-platform mobile apps in Flutter, integrating AI features across core screens.
- Improved app-state management alongside senior developers, contributing to a reduction in reported crashes.

Projects

DeepLens – Enterprise Multi-Agent RAG Platform

GitHub

Python, FastAPI, LangGraph, LangChain, ChromaDB, FAISS, Groq, Gemini, React, TypeScript, Docker

- Built document ingestion and processing pipelines for enterprise knowledge bases, handling document parsing, chunking, metadata extraction, embedding generation, and vector storage.
- Implemented retrieval workflows using ChromaDB and FAISS with LLM-powered contextual generation, enabling grounded responses over indexed enterprise documents.
- Developed FastAPI services and structured agent workflows for data processing, retrieval, and response generation, with Dockerized deployment and persistent document/embedding management.

WhatsApp CRM for Library Management

GitHub

Node.js, Express.js, MongoDB, Baileys, Next.js, OpenAI

- Built a real-time data ingestion system extracting structured transactional records such as fees, payments, and registrations from unstructured WhatsApp input into MongoDB, with automated validation checks maintaining data integrity for 50+ active users.
- Built and shipped a production admin dashboard used to monitor and report on library operations, converting raw transaction data into actionable reporting.

RealPath – AI Resume Builder & ATS Analyzer

Live Demo

React, Next.js, Node.js, Express, MongoDB, OpenAI GPT API

- Built a full-stack data-extraction and scoring engine parsing free-text resume input into structured JSON tags, with quantitative compatibility scoring against job requirements.
- Presented compatibility scores and skill-gap detection results through an interactive live-preview dashboard.

Document Saathi – Secure Family Document Vault

GitHub

Flutter, Supabase, SQLite, Firebase

- Built a structured, encrypted record-management system for banking/legal document data, adopted by 20+ users.

Education

Indian Institute of Information Technology, Manipur

2023 – 2027

B.Tech in Computer Science & Engineering (AI & Data Science)

Certifications & Achievements

- Solved 1150+ DSA problems on LeetCode
- Secured 1st Place in the Website Development Competition at IIIT Manipur
- Ranked 88 in HackerX 2025 Hackathon
- NPTEL – Business Analytics
- NPTEL – Information Retrieval
- NPTEL – Advanced Distributed System
- MongoDB Developer Learning Path – MongoDB University (2025)
- Languages: English (Fluent), Hindi (Native)
