Professional Summary

Final-year Computer Science undergraduate specializing in AI & Data Science and an AI Engineer & Full Stack Developer with hands-on experience building production web, mobile, and AI applications end-to-end. Experienced in full-stack development, REST APIs, LLMs, AI agents, prompt engineering, and database-driven systems. Built and maintained systems used by 50+ and 20+ real users respectively, across three internships spanning mobile, AI-integrated backend, and full-stack web development. Solved 1150+ DSA problems on LeetCode.

Technical Skills

Languages:	JavaScript, TypeScript, Python, SQL, C++
AI / ML:	OpenAI, Gemini, Groq, LangChain, LangGraph, RAG, AI Agents, MCP, Prompt Engineering, ChromaDB, FAISS, scikit-learn, spaCy, OCR
Frontend:	React, Next.js, React Native, Flutter, Redux Toolkit, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend:	Node.js, Express.js, FastAPI, .NET, REST API Design & Integration, JWT Authentication, Socket.io, Webhooks
Databases:	MongoDB, PostgreSQL, MySQL, SQLite, Redis, Supabase, Firebase
DevOps & Tooling:	Docker, CI/CD, Git, GitHub, Postman, Playwright, Vercel, Render
Engineering Practices:	System Design, API Development, Debugging, Unit Testing, Code Review, Agile/Jira

Experience

Ramyo Solutions, Punjab

Jun 2026 – Aug 2026

App Developer Intern

On-site

- Built AI-enabled cross-platform mobile apps in Flutter, integrating AI features and REST API calls across core screens.
- Improved app-state management and UI performance alongside senior developers, reducing reported crashes.

Amdox Technologies

Feb 2026 – Apr 2026

Web Developer Intern

Remote

- Developed responsive, high-performance web apps using React, Node.js, and MongoDB, integrating REST APIs end-to-end for reliable data flow.
- Partnered with UI/UX and engineering on code reviews, debugging, and data-integrity checks within Agile/Jira sprints.
- Optimized component rendering and API call patterns to improve page load performance, and resolved bugs surfaced during QA cycles.

Codec Technologies

May 2026 – Jul 2026

Artificial Intelligence Intern

Hybrid

- Built AI-powered backend features using LLMs and prompt engineering, integrating OpenAI/Gemini APIs and shipping REST endpoints for intelligent workflow automation.
- Designed and iterated on prompt templates to improve response accuracy and reduce latency, and documented API endpoints for internal team use.

Projects

NightOwl – AI-Powered Job Application Automation Platform

GitHub

Python, FastAPI, Playwright, MySQL, Next.js, AI Agents, ChatGPT, Gmail, WhatsApp

- Built an end-to-end job application automation platform that discovers verified company career pages and jobs, analyzes application forms, maps candidate data, fills dynamic fields, and tracks applications through a persistent job queue.
- Implemented intelligent question resolution using a Candidate Knowledge Base, Answer Bank, deterministic rules, and browser-based ChatGPT fallback for contextual application questions.
- Automated complex application workflows including date fields, checkboxes, radio buttons, dropdowns, autocomplete, resume uploads, email verification, and multi-page forms with human-review safeguards.

RealPath – AI Resume Builder & ATS Analyzer

Live Demo

React, Next.js, Node.js, Express, MongoDB, OpenAI GPT API, Tailwind CSS

- Built a full-stack ATS-style resume analyzer with live preview, PDF export, authentication, and AI-powered compatibility scoring against job descriptions.
- Integrated OpenAI GPT API for AI-powered feedback and personalized suggestions, with template customization and subscription management.
- Deployed frontend on Vercel and backend on Render with documented setup and ongoing feature updates and bug fixes.

WhatsApp CRM for Library Management

GitHub

Node.js, Express.js, MongoDB, Baileys, Next.js, OpenAI

- Built and shipped a production CRM adopted by 50+ active students, automating onboarding, fee reminders, and payment verification with an admin dashboard for AI-powered query resolution.
- Implemented real-time data ingestion, extracting structured transactional records from unstructured WhatsApp input into MongoDB.
- Maintained the tool live in production with ongoing bug fixes and new feature releases, backed by README documentation and inline code comments.

Document Saathi – Secure Family Document Vault

GitHub

Flutter, Supabase, SQLite, Firebase

- Built a cross-platform document vault with PIN-based access control and encrypted, permissioned storage for banking/legal use-cases, adopted by 20+ users.

Education

Indian Institute of Information Technology, Manipur

2023 – 2027

B.Tech in Computer Science & Engineering (AI & Data Science)

Certifications & Achievements

- Secured 1st Place in the Website Development Competition at IIIT Manipur
- Ranked 88 in HackerX 2025 Hackathon
- Solved 1150+ DSA problems on LeetCode
- NPTEL – Business Analytics
- NPTEL – Information Retrieval
- NPTEL – Advanced Distributed System
- MongoDB Developer Learning Path – MongoDB University (2025)
- Languages: English (Fluent), Hindi (Native) | Traits: Self-learner, team player, product thinker
